Smart Government Queue Tracking Platform

User Stories & Acceptance Criteria

Version 1.0 — Hackathon MVP Edition | June 2026

Version 1.0 | June 2026 | Hackathon MVP Edition

Epic Structure

Epic ID	Epic Name	Primary Persona
E-01	Account & Authentication	Citizen, Admin
E-02	Service Discovery	Guest, Citizen
E-03	Queue Booking	Citizen
E-04	Ticket Tracking	Citizen
E-05	Staff Queue Operations	Counter Staff
E-06	Supervisor Operations	Supervisor
E-07	Notifications	Citizen
E-08	Reporting & Analytics	Supervisor, Admin
E-09	Public Display Board	Guest
E-10	AI Prediction	Citizen, Guest
E-11	Administration	Admin
E-12	Audit & Compliance	Admin, Supervisor

Epic E-01: Account & Authentication

Story ID	US-001
Epic	E-01
Persona	Citizen
User Story	As a citizen, I want to register with my phone number and name so that I can book queue slots.
Business Value	Enables citizen self-service without requiring in-person registration
Priority	Must
Acceptance Criteria	1. Registration form accepts phone number (E.164 format) and full name.2. System sends OTP to phone (mocked for MVP: static code 123456).3. On OTP verification, account is created and JWT tokens are issued.4. Duplicate phone numbers are rejected with error PHONE_ALREADY_REGISTERED.5. Registration succeeds in ≤3 form steps.
Dependencies	None
Notes	OTP delivery is mocked for MVP; real SMS integration is Phase 2

Story ID	US-002
Epic	E-01
Persona	Citizen
User Story	As a citizen, I want to log in with my phone number so that I can access my bookings.
Business Value	Secure, friction-reduced authentication familiar to target users
Priority	Must
Acceptance Criteria	1. Login requires phone number + OTP.2. Valid credentials issue access + refresh tokens.3. Tokens stored in HttpOnly cookies or secure localStorage.4. Failed login increments attempt counter; 5 failures lock account for 30 min.5. Successful login redirects to citizen home screen.
Dependencies	US-001
	JWT access token expiry = 15 min; refresh token = 7 days

Notes	
Story ID	US-003
Epic	E-01
Persona	Admin
User Story	As an admin, I want to create staff and supervisor accounts so that they can access the system with appropriate roles.
Business Value	Centralized user management; prevents unauthorized access
Priority	Must
Acceptance Criteria	1. Admin can create users with name, phone, and role (staff, supervisor, admin).2. Created user can log in immediately.3. Role is enforced on all subsequent API requests.4. Admin cannot assign a role higher than their own.5. User creation is logged in audit log.
Dependencies	FR-01-05
Notes	Admin initial seed account created via migration script

Epic E-02: Service Discovery

Story ID	US-010
Epic	E-02
Persona	Guest
User Story	As a guest, I want to see all available services and their current queue lengths so that I can decide whether to visit the branch today.
Business Value	Reduces unnecessary branch visits; drives adoption
Priority	Must
Acceptance Criteria	1. Service list is visible without login.2. Each service shows: name (localized), current queue length, daily capacity, and load % indicator.3. Predicted wait time for a new booking is displayed per service.4. List auto-refreshes every 60 seconds or on manual refresh.

Dependencies	FR-03-04, FR-12-01
Notes	

Epic E-03: Queue Booking

Story ID	US-020
Epic	E-03
Persona	Citizen
User Story	As a citizen, I want to book a queue slot for a specific service so that I can secure my place without going to the branch.
Business Value	Core platform value proposition
Priority	Must
Acceptance Criteria	1. Citizen selects a service and confirms booking in ≤ 3 steps.2. System assigns unique ticket number (e.g., NID-042).3. Ticket confirmation screen shown immediately with number, position, and predicted wait.4. Booking rejected if: daily capacity reached, citizen has active booking, outside operating hours.5. In-app notification sent on confirmation.
Dependencies	US-001, FR-04
Notes	Optimistic locking prevents race condition on last slot

Story ID	US-021
Epic	E-03
Persona	Citizen
User Story	As a citizen, I want to cancel my booking before the cutoff time so that I can free the slot for others if my plans change.
Business Value	Reduces no-show rate; improves slot utilization
Priority	Must

Acceptance Criteria	1. Citizen can cancel from ticket detail screen.2. Cancellation is blocked after cancellation cutoff time (configurable, default 10 min).3. On cancellation, ticket status becomes "cancelled".4. Slot is freed; daily available count increments.5. In-app notification confirms cancellation.
Dependencies	US-020
Notes	Cancellation cutoff uses predicted call time, not fixed clock time

Story ID	US-022
Epic	E-03
Persona	Citizen
User Story	As a citizen, I want to modify my booking to a different service type so that I can change my mind without losing my queue position.
Business Value	Reduces cancellation + rebooking friction
Priority	Should
Acceptance Criteria	1. Citizen can select "Change Service" from ticket screen.2. New service must have available capacity.3. Ticket number resets (new sequence for new service).4. Old slot freed; new slot booked atomically.5. Modification logged in ticket_status_history.
Dependencies	US-020
Notes	Position in new queue is appended (end of queue), not preserved

Epic E-04: Ticket Tracking

Story ID	US-030
Epic	E-04
Persona	Citizen
User Story	As a citizen, I want to see my current queue position and predicted wait time so that I know when to head to the branch.
Business Value	Core real-time value; reduces branch crowding

Priority	Must
Acceptance Criteria	1. Ticket screen shows: ticket number, current position, predicted wait time.2. Position updates automatically (SSE or polling ≤30s).3. If position is 1–3, "Head to branch now" message is shown.4. Predicted wait is recalculated on each update.5. Ticket status (e.g., waiting, called, serving) shown prominently.
Dependencies	US-020, FR-12-01
Notes	

Story ID	US-031
Epic	E-04
Persona	Citizen
User Story	As a citizen, I want to check in when I arrive at the branch so that the system knows I am present.
Business Value	Reduces no-show false positives; activates grace period correctly
Priority	Must
Acceptance Criteria	1. Check-in button visible on ticket screen when ticket is in "booked" or "waiting" state.2. On check-in, ticket status transitions to "checked_in".3. Confirmation message shown.4. Check-in is idempotent (pressing again shows "Already checked in").
Dependencies	US-030
Notes	Staff check-in override is Phase 2

Epic E-05: Staff Queue Operations

Story ID	US-040
Epic	E-05
Persona	Counter Staff
User Story	As counter staff, I want to call the next ticket for my window so that I can begin serving the next citizen.

Business Value	Core staff workflow; drives queue progression
Priority	Must
Acceptance Criteria	1. "Call Next" button prominent on staff interface.2. Next ticket in queue (for staff's assigned service) is retrieved atomically.3. Ticket status transitions to "called"; grace period timer starts.4. Ticket number displayed prominently on staff screen and public display board.5. Staff interface shows citizen name and ticket number.6. If no tickets available, button shows "Queue Empty".
Dependencies	US-020, FR-07-03
Notes	Optimistic lock prevents two staff from calling same ticket

Story ID	US-041
Epic	E-05
Persona	Counter Staff
User Story	As counter staff, I want to mark a ticket as done, skipped, or no-show so that the queue progresses correctly.
Business Value	Accurate queue state; audit trail
Priority	Must
Acceptance Criteria	1. After calling a ticket, staff sees options: Done, Skip, No-Show.2. Selecting each transitions ticket to the respective terminal state.3. All transitions logged in ticket_status_history with actor and timestamp.4. Queue position of all "waiting" tickets recalculates immediately.
Dependencies	US-040
Notes	done = citizen served; skipped = staff decision; no_show = citizen did not arrive

Epic E-06: Supervisor Operations

Story ID	US-050
Epic	E-06
	Branch Supervisor

Persona	
User Story	As a supervisor, I want a live dashboard of all windows so that I can monitor branch operations in real time.
Business Value	Operational visibility; proactive management
Priority	Must
Acceptance Criteria	1. Dashboard shows all windows with status (open/closed/paused), current ticket, staff assigned, and transactions today.2. Queue length per service visible.3. Dashboard refreshes ≤15 seconds.4. Summary row: total served, total waiting, total no-shows for the day.
Dependencies	FR-07, FR-08
Notes	

Story ID	US-051
Epic	E-06
Persona	Branch Supervisor
User Story	As a supervisor, I want to post a branch announcement so that citizens and display board viewers are informed of delays or changes.
Business Value	Real-time communication; reduces citizen frustration
Priority	Must
Acceptance Criteria	1. Supervisor can write and post an announcement (AR and EN text).2. Announcement immediately visible on public display board.3. In-app notification sent to all citizens with active tickets for the day.4. Supervisor can deactivate/delete announcements.
Dependencies	FR-08-03
Notes	

Epic E-07: Notifications

Story ID	US-060
-----------------	---------------

Epic	E-07
Persona	Citizen
User Story	As a citizen, I want to receive a notification when my turn is approaching so that I know to head to the branch.
Business Value	Reduces no-shows; improves citizen experience
Priority	Must
Acceptance Criteria	1. Notification triggers when N tickets ahead (configurable, default: 3). 2. Notification includes: ticket number, current position, predicted wait. 3. Notification appears in notification bell in app UI. 4. Notification not re-sent if already sent for same threshold.
Dependencies	US-020, FR-09-04
Notes	In-app only for MVP; SMS is Phase 2

Epic E-08: Reporting & Analytics

Story ID	US-070
Epic	E-08
Persona	Supervisor
User Story	As a supervisor, I want to view a daily summary report so that I can understand branch performance.
Business Value	Data-driven management; accountability
Priority	Must
Acceptance Criteria	1. Report shows: total bookings, total served, no-shows, cancellations for selected date. 2. Breakdown by service type. 3. Average wait time per service. 4. Peak hour chart (bookings per hour). 5. Date picker defaults to today.
Dependencies	FR-10
Notes	

Epic E-09: Public Display Board

Story ID	US-080
Epic	E-09
Persona	Guest
User Story	As a guest at the branch, I want to see the current ticket being served on a display board so that I know when my number is close.
Business Value	Physical branch experience improvement; reduces staff calls
Priority	Must
Acceptance Criteria	1. Board shows current ticket number per window in large font ($\geq 72\text{pt}$).2. Next ticket in queue also shown.3. Branch announcement banner shown if active.4. Auto-refreshes every 10 seconds.5. Accessible without login.
Dependencies	FR-11
Notes	

Epic E-10: AI Prediction

Story ID	US-090
Epic	E-10
Persona	Citizen / Guest
User Story	As a citizen or guest, I want to see an AI-predicted wait time so that I can plan my visit intelligently.
Business Value	Key differentiator; improves decision-making
Priority	Must
Acceptance Criteria	1. Predicted wait time displayed on: service list, ticket detail, public display board.2. Prediction based on: tickets_ahead, avg_handling_time, active_windows, historical throughput.3. If prediction fails, "Estimated: N/A" shown (no error).4. Prediction visible to unauthenticated guests.5. Prediction refreshes with queue state updates.
	FR-12

Dependencies	
Notes	Heuristic formula; no ML model required for MVP

Epic E-11: Administration

Story ID	US-100
Epic	E-11
Persona	Admin
User Story	As an admin, I want to configure queue rules so that branch operations follow our policies.
Business Value	Operational flexibility without developer involvement
Priority	Must
Acceptance Criteria	1. Admin can set: grace_period_minutes (1–60), cancellation_cutoff_minutes (0–120), max_active_bookings_per_citizen (1–5), turn_approaching_threshold (1–10).2. Changes take effect immediately for new transactions.3. Config changes logged in audit log.
Dependencies	FR-15-01
Notes	

Story Implementation Order

Suggested build order to maximize integration velocity and unblock parallel work.

Sprint Order	Story	Rationale
1	US-003 — Admin create users	Enables all staff accounts before anything else
2	US-001, US-002 — Citizen auth	Unblocks all citizen-facing flows
3	US-010 — Service discovery	Unblocks frontend service list work
4	US-020 — Booking	Core value proposition; most complex business logic
5	US-040, US-041 — Staff operations	Needed to move tickets through states
6	US-030, US-031 — Ticket tracking	Real-time position display for citizens

7	US-050, US-051 — Supervisor dashboard	Operations monitoring and announcements
8	US-060 — Notifications	Turn-approaching and called alerts
9	US-080 — Display board	Physical branch experience; consumes existing APIs
10	US-090 — AI prediction	Builds on queue engine data
11	US-070 — Reports	Aggregates existing data
12	US-021, US-022 — Cancel/modify booking	Important but not blocking
13	US-100 — Admin config	Configurability layer on top of working system
